spooknet
a PHATstar production

30+ echonet message areas, 7+ filebone areas, BinkP, 1Gbit/s, 700:100/*

bbs name:

location:
(town/city, province/state, country)

full real name:
(first, middle, last)

handle/alias:
(the name that you are known by on computer networks)

board os:
(your bulletin board system software)

hours open:
(what are the hours that your bbs is online)

address:port
(internet address and port number to connect to your bbs with)

protocol:
(telnet, ssh, or rlogon to connect to your bbs with)

e-mail address:
(ex. yourname@server.com)

binkp address and port:
(the internet address for binkp on your system and its port number)

cram-md5:
(should cram-md5 be used on your system)

binkp password:
(the password for binkp on your system)

areafix password:
(your desired password for areafix on spooknet)

filefix password:
(your desired password for filefix on spooknet)

max nodes:
(how many people can log on to your system at the same time)

religion:
(what is your religious background --- will not affect application approval; for demographics)

politics:
(what is your political background --- will not affect application approval; for demographics)

other echomail networks:
(what other fido-type networks is your system connected to)

be a host:
(would you be interested in being a regional/area hub for spooknet)

submissions:

Please save and e-mail this application as YOURBBSNAME.SPOOKNET.APP.TXT, such as RETROBOX.SPOOKNET.APP.TXT, to spooknet@phatstar.org as a file attachment. It may take a several days for your application to be processed, but we will attempt to get it done quickly. If you would like to donate to the work of the SpookNet Echomail Network you can send money via PayPal to spooknet@phatstar.org.

background:

spooknet is a phatstar production
phatstar is a private society of computer professionals
phatstar stands for "progressive hackers and technologists"
we are "whitehat hackers" (the good guys)
spooknet runs off of a dedicated server with a one gigabit network connection
the software behind the network is mystic bbs
this is an english only network that supports using ansi graphics in posts
in addition to message areas spooknet also offers file areas
warmfuzzy, silent partner, and necromaster work to keep the network purring
